## ABOUT ME

Passionate and results-driven Data Analyst with a strong foundation in client services and problem-solving. Known for my adaptability, critical thinking, and commitment to striving for the highest quality standards.

My main focus as an analyst is on eliminating redundant tasks, optimizing efficiency, automating workflows, and helping departments innovate and establish standardized data analysis processes through collaboration and critical thinking.

## WORK EXPERIENCE

### Sr. Field Support Analyst | Vendor & Procurement

FLIX/ Greyhound - FLIX NORTH AMERICA

2026 - Now

Currently supporting and leading FLIX's North American transition and post-acquisition operational integration of Greyhound, helping modernize station maintenance and vendor operations through cost control, procurement analytics, and process standardization.

#### Key Responsibilities:

- Lead a team of Field Support Agents responsible for reviewing and escalating facility maintenance requests across FLIX / Greyhound locations in North America, ensuring timely triage, vendor coordination, and service continuity.
- Manage the end-to-end bid and quote review process for station and facility maintenance work, sourcing vendors, requesting proposals, evaluating service pricing, and selecting cost-effective solutions aligned with operational needs and budget expectations.
- Partner closely with Procurement to design and strengthen a vendor management program focused on cost competitiveness, benchmark control, and long-term supplier performance.
- Analyze vendor quote data to identify overbidding trends, pricing inconsistencies, and benchmark variance by city, service category, and vendor, helping drive sourcing strategy, renegotiation opportunities, and preferred vendor list decisions.

#### Core Skills/ Business Impact

- **Vendor Management & Procurement Analytics:** Built reporting logic to evaluate vendor competitiveness, identify overbidding behavior, and support renegotiation or removal from preferred vendor pools.
- **Process Improvement & Automation:** Built an internal procurement intelligence system from scratch, centered around a structured vendor proposal form that feeds directly into a benchmarking calculator.  
Data Standardization & Reporting Transformation: Replaced 120 inconsistent monthly vendor
- **Operational Efficiency:** Enabled faster bid reviews, automated approval flagging, and a Power BI reporting pipeline that transformed vendor quote activity into actionable procurement intelligence.
- **Cross-Functional Leadership:** Worked across Field Support, Facilities, and Procurement to align service execution with cost strategy, compliance, and long-term operational sustainability.

## HIGHLIGHTS

- Successfully initiated and led two CX/ B2B projects as a Data Analyst pioneering the development and implementation of SOPs
- Created structures and processes for analyzing, interpreting, and producing actionable reports ensuring top-notch client services

## SKILLS

### Experience with the following CRM Softwares, such as:

- Salesforce, Oracle, Zendesk, and EPIC

### Microsoft Office Apps such as:

- Excel, PowerPoint, and Power BI

### Analytical Skills:

- Cleaning, and Organizing Data
- Root Cause Analysis (RCA)
- Producing actionable and visually meaningful dashboards and reports

### Client Relationships:

- Building and maintaining healthy client relationships with B2B rapport
- Professional written and verbal communication Skills

### Domain Specific Languages:

- HTML, SQL, DAX and M (Power Query)

## CERTIFICATIONS

- ACE Leadership Course
- Digital Marketing
- Database & SQL for Data Science

## Logistics Specialist

General Motors (GM) - WWEX GROUP

2025 - 2026

Specializing in logistics coordination, freight operations, and supply chain management, serving as the primary liaison between franchise partners, carriers, and operations teams to ensure seamless communication and efficient transportation execution.

### Key Responsibilities:

- Managed and audited Bill of Lading (BOL) documentation, shipment manifests, and compliance records to ensure adherence to DOT, OSHA, and U.S. Customs regulations.
- Maintained continuous communication with Key Account Managers, clients, and operations teams to align delivery timelines, resolve logistics issues, and enhance service reliability.

### Process & Performance Improvement:

- Implemented process optimization and automation strategies to reduce transit times, lower operational costs, and increase supply chain visibility.
- Monitored and reported key performance indicators (KPIs), including on-time delivery, cost per shipment, and customer satisfaction metrics, to drive continuous improvement and operational excellence.

## Sr. Quality/ BI Analyst

Exact Sciences Laboratories - CP360

2023 - 2025

Through strategic data analysis and advanced reporting, I identified key trends, developed actionable insights, and implemented data-driven solutions that enhanced service quality and operational efficiency.

### Key Responsibilities:

- Led quality improvement initiatives using performance data to identify opportunities, implement corrective actions, and optimize service delivery.
- Designed and maintained Power BI dashboards to visualize KPIs, monitor agent performance, and automate reporting processes for real-time insights.

### Core Skills:

- **Data Analysis & Visualization:** Expertise in transforming complex datasets into actionable insights using Business Analytics tools such as Excel and Power BI for KPI tracking and data automation.
- **Calibration:** Experienced in conducting calibration sessions with Specialists, Team Leads, and Operations Managers to align quality expectations, strengthen evaluation accuracy, and drive consistency across operations.
- **Coaching and Training:** Skilled in motivating and developing team members through empathy, active listening, and constructive feedback. Focusing on building trust, recognizing achievements, and shaping a supportive environment that promotes accountability, engagement, and clear professional growth paths.
